**PERFORMANCE  
TERMINAL TACKLE**

**Innovative Fishing Tackle for Fresh & Saltwater**

*Catching Fish is Everything™*

# Welcome to Fin-tech Tackle.

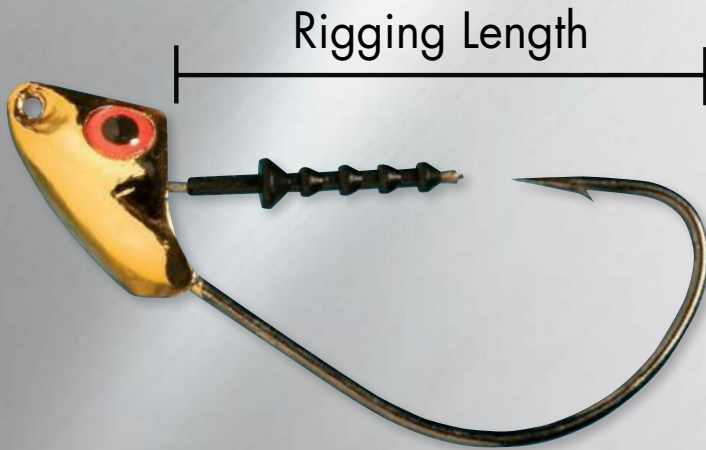

We, at Fin-tech, design & manufacture innovative terminal tackle for Fresh & Salt water applications. Our products are developed by anglers for anglers. We use the very best in materials, including premium hooks and stainless steel components, while maintaining a fair price to you, the angler. Whether you're a weekend family angler or a Touring Professional, we believe **"Catching Fish is Everything"**.

From all of us at Fin-tech, please practice **CPR** — **C**atch, **P**icture, **R**elease.

President

## Proper Bait Sizing for your Title Shot Jig

10mm = Approx. 3/8 inch  
25mm = Approx. 1 inch

# 1-2-3 Punch!

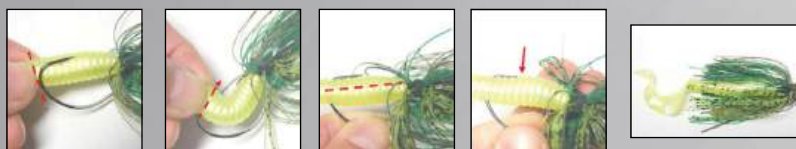

- 1. Title SHot Jig
- 2. TS + Skirt
- 3. TS + Skirt + Plastic

### Title SHot® Rigging Basics

- 1. Grab skirt by collar & rotate between fingers to expose skirt center. A dab of moisture in center will ease sliding skirt on retainer.
- 2. Push skirt past large cone.
- 3. Push skirt tight to jig head.
- 4. Make pilot hole in plastic and remove.
- 5. Insert on retainer, push tight to large cone.

- 6. Lay hook on plastic, use thumb as guide.
- 7. Push hook perpendicular through plastic.
- 8. Hook exposed, plastic should be straight.
- 9. Lightly bury hook point in plastic for extra protection.
- 10. Title SHot Jig rigged with skirt and plastic.

# Title SHot® Jig Series

## Innovation and Versatility

The patented Title SHot® Jig offers significant technological advancement in versatility and performance. The heart of the Title SHot® Jig is the patented Retainer/Guard System.

With pressure applied, the Retainer/Guard collapses rather than flexing, allowing the jig's full bite to come into play.

No fiber-guard bumping to impede jig consumption. More hook-ups. The bullet style head is virtually weedless and features Mustad® Ultra Point wide gap hook.

The Title SHot® Jig will not rotate on the retrieve, eliminating line twist, a super swimming jig.

Excellent for rigging of all soft plastic lures, including spider grubs and tubes. Skirts and Rattles are optional.

## Title SHot "MONSTER" Swimbait System

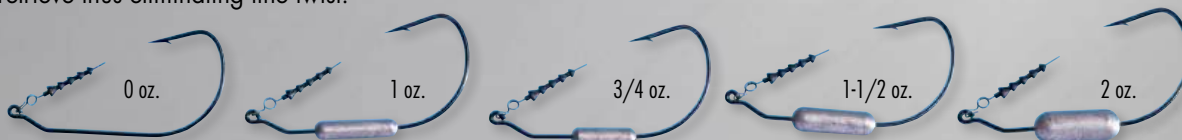

Combining the exclusive 15/0 Wide Gap hook with our Patented sliding weight and retainer system, the Title SHot MONSTER SYSTEM is unmatched in the industry for rigging super sized soft plastic for Bass, Pike, Muskie and Saltwater Game Fish.

This design is virtually weedless. The adjustable sliding weight allows for precise presentations and unique actions. The system will not rotate on the retrieve thus eliminating line twist.

# The "SS Minnow" has all the features for the perfect Swim bait jig!

The SS Minnow Jig design features include:

- Realistic Shape with large 3-D molded eyes
- Realistic/Durable chip resistant life-like finish
- Keel Shape for true running baits / no roll over
- Stand-up design
- Unique dual line-tie gives the option to choose the desired action or presentation as needed. Use the top line-tie eyelet for vertical jiggling and aggressive vibrating swimming action. Use the nose line-tie eyelet for a more subtle swimming/ towing action and for casting around weeds.

SS Minnow is equipped with a double wire-barb keeper system for extra Swim bait lure holding power.

The removable Spin Blade features a ball bearing swivel that is corrosion resistant. The Blade adds flash and vibration to draw fish in from a wide range. Remove the Blade for less aggressive action or for tying a stinger hook for short biters.

The Premium Mustad Ultra Point Hooks come in 3 sizes and 2 wire diameters. The Long thin wire Shank - Wide Gap hook is designed to handle a variety of Swim bait/Plastic lures available. This is the ultimate in Swim bait Presentations!

# Nuckle Ball® Jig Series Innovation & Functionality

The Nuckle Ball Jig design is unique and proven as the most advanced jig available.

**The features designed into the jig are as follows:**

- Standup head design
  - Keeps Bait presentation in view of predator
  - Center of gravity below line tie
- 100 % Open Gap (Gap = distance from hook shank – point)
  - Increases probability of hooking fish to a maximum
- Kinked Shank design for multiple rigging options: exposed or weedless
- Premium Hook
  - Ultra Sharp – Ultra Strong – Corrosion Resistant
- Line tie strategically placed at the jigs balance point
  - Never clean paint out of eye
- Multiple sizes and colors for any situation/condition

The Nuckle Ball stands up relentlessly on the bottom to minimize snags and keeps the bait upright for natural presentations.

The jig hangs horizontal when suspended or on a swimming retrieve as well it has a unique "Teeter Totter" action when vertically jigged.

The Patented Nuckle Ball can be rigged with exposed hook or weedless and comes in 3 styles

**Original (Round style)**

The Original Nuckle Ball is the go to series for most every fishing condition and species.

**Zone "R" (Aspirin Style)**

The Zone "R" Nuckle Ball has a thinner head design for less water resistance when fishing deep water, river current and/or trolling including snap jigging.

The thinner head (Aspirin) style design also has an increased side profile for higher visibility in dark/dirty water conditions.

**Bass "N" (Wide gap/thin head)**

The Bass "N" Nuckle Ball features a wider gap Premium Hook and a thinner head design for larger plastic presentations.

## Nuckle Ball® Rigging Basics

### Exposed Hook Rigging

1. Insert hook in plastic lure the same distance as between the jig-head & hook shank.

2. Thread hook through plastic, slide sideways up behind head.

3. Rotate plastic in position behind head.

### Weedless Rigging

1. Insert hook in plastic lure the same distance as between the jig-head & hook shank, poke all the way through.

2. Slide plastic sideways up behind head.

3. Rotate plastic in position behind head and bury hook.

## Nuckle Ball® Jig Original 2-Tone Colors

The original, proven fish-catching machine. With it's balanced head and snag free design it offers incredible natural presentations.

## Nuckle Ball® "Jitt-R" Jig

Day-Brite Gold  
08

The "Jitt-R" jig is a deadly combination of the Nuckle Ball jig and a precise movable blade. The combination of Flash - Vibration & Stand Up ability make this jig a winner! Pitch, drag, troll or vertical jig this one and hang on let the jig do the work.

Ice fisherman have had tremendous success with these features for vertical jigging. The erratic action attracts gamefish the Jitt-R jig is then held motionless presenting the bait naturally horizontal or allowed to hit the bottom and stand up like a feeding minnow.

## Tech Stik "EZ Weight Change" Slip Sinker

Designed to be versatile on all bottom conditions. The tapered shoulder & curvature of the sinker allow it to slide snagless along any bottom conditions. The buoyant rattle chamber sends out sound for fish to zero in on in off colored/stained water conditions. The small tapered eyelet prevents line twist and the ability to use the smallest of swivels. The EZ Weight Change design allows you to change weight without retying - less rigging, more fishing!

Weight	
oz	g
1/8	3.5
1/4	7.1
3/8	10.6
1/2	14.2
5/8	17.7
3/4	26.3

## "Slo-D" Tech Rig

A combination of the "EZ Weight Change" Tech Stik slip sinker and a **Mustad "Slow-Death" Hook** tied on a **Berkley Big-Game** 10 lb. test snell completes the ready to fish rig.

The "Slow Death" tournament winning technique was developed during the 1990's by several professional walleye anglers. Incredible natural action was added to their live bait presentations by using hooks bent in a specific fashion, threading on a half a night crawler resulting in an irresistible corkscrew action, enticing even the most reluctant fish to strike. Attach a weight, and the year-round power finesse rig can be used for all species of fish.

Package consists of 2 black Tech Stiks & 2 complete "Slo-D" rigs.
